All the plants in this book grow well in cold climates such as Canada and in the West, Midwest, Northeast areas of United States. For better results and optimum growth, you can select the plants by matching each plants' hardiness zone in the area you live. You can refer to the Canada and United States Plants Hardiness Zone Map given in this book. Plant groups in this book are not planting plans. They are arranged for easily identifying the plants, matching, and comparing plants characteristics, such as color, shape, and texture. In addition, considering plants' sunlight requirement, height, width, flowering time will give you a happier, healthier, and more beautiful garden.
